[Read Customer Reviews](#)

Totally Hands-Free: Step, Drop, Done! No Bending, No Twisting, No Squishing, Unlike Ordinary Pails!

Most Cost-Effective Diaper Pail Refill System on the Market. Dekor Refill System Creates Less Waste - Use ONLY What You Need!

Effective Triple Odor Control Keeps the Smell in the Pail

Award Winning Product Tested by Millions of Parents

Closed-Cell ABS Plastic Works Like Metal but Won't Rust

Use Only Genuine Dekor Refills with Exclusive End-of-Liner Marking

Comes Completely Assembled with One Full-Sized (not a starter!) Refill Pre-Installed!

Life After Diapers: Converts from Diaper Pail to Trash Can No Touch

Dekor pails are 100% hands-free. Just Step on our foot pedal and Drop the soiled diaper through the trap door. Done! No Bending. No twisting. No squishing. No other diaper pail is as easy or hygienic to use.

It Makes Cents

Dekor's powder-scented refills protect against odors and save you money, holding more diapers per refill. Our refills are continuous liners. No preset perforations mean you can throw away one diaper or a 'butt load' without wasting a whole tall kitchen bag. Now with a NEW End of Liner Marking!

Not Just for Diapers

You'll use your Dekor long after you are finished with diapers. Just pop out the diaper insert and use it in the bathroom, kitchen or garage! Many owners use their Dekor pail as a convenient and odor-reducing way to dispose of pet waste.

Don't Be Fooled! Hands-Free Means No Touching. No Bending, No Twisting, No Squishing.

Step

Dekor's Ergonomic Foot Pedal opens the lid for you.

Drop

Simply drop the soiled diaper through the spring-loaded OdorKeeper trap door. No bending, no twisting, no squishing.

Done

The Self-Closing Whisper Lid shuts quietly when you release the foot pedal. You are done without ever touching the pail.

Open

When ready to empty your Dekor pail, open the easy-access service door and pull out the continuous refill liner just far enough to remove the contents.

Cut

Use the child-safe cutter conveniently mounted on the door to cut the continuous refill liner at the top of the refuse. Pro Tip: Allow for room to tie a knot in the 'bag' before disposing of it curbside.

Tie

Tie a new knot in the bottom of the continuous refill liner to form a new 'bag'. Close the service door, and you are done.
